

Richpeace Computerized Quilting & Embroidery Machine

— Single Color Single Roll

This machine is widely used for processing garments, hand bags and all kinds of high-quality bedding products, such as, thin quilts, thin mattress, winter cloth, bed cover, pillow cover, sleeping bags, cushion, etc.

Main Features & Functions:

- Full features Quilting Embroidery Control System, equipped with 10.4 Touch Screen Control Panel, user friendly window style display.
- 33 dual needles sewing heads, maximum 66 needles sewing at the same time. In theory, maximum quilting embroidery width is 3600mm.
- Each head works in small stitch sewing at minimum 50.8mm (2 inches). Base on production requirement, each needle of two can be manually switch on or off individually, set the sewing stitch size to 50.8mm (2 inches), 101.6mm, 203.2mm accordingly, plus alternate head lock function, realize ability to do complicated patterns production.
- Working speed 750-800 rpm.
- Automatic thread breakage detection, shorten machine down time, increasing the productivity.
- Equipped with jumbo rotary hook with larger thread holding capacity, decrease bobbin replacement time, further increase production time.
- Material loading and reverse movement is controlled by Y-direction rollers, X-direction driving stud mechanical movement is driven by servo motors. All driving stud, railway, and servo motors are using same parts as our model RP424 Quilting Embroidery Machine..

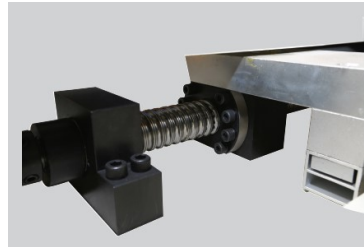

Richpeace®

Main Configuration:

Computer
10.4 inches
Touching screen,
Vivid display, easier
operate computer
control system

**Lead Screw
Drive**

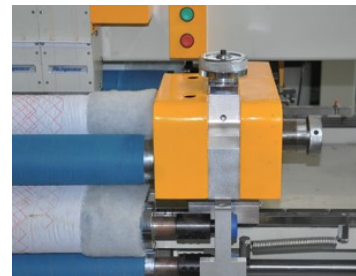

**Panasonic
Servo Driver**

**Panasonic
Servo Motor**

**Taiwan
Linear Guide
Rail**

**Roller
System** enables
mass production
and
continuously
working as well.

Dual Needles Arm Device:

specialized double needle bar driving system, one head dual needles work at the same time, which highly improve production efficiency

The Integration of Upper Thread and Bottom Thread Break Detection

single side reset switch control each needle, which is convenient for any alternate head , to realize long distance quilting

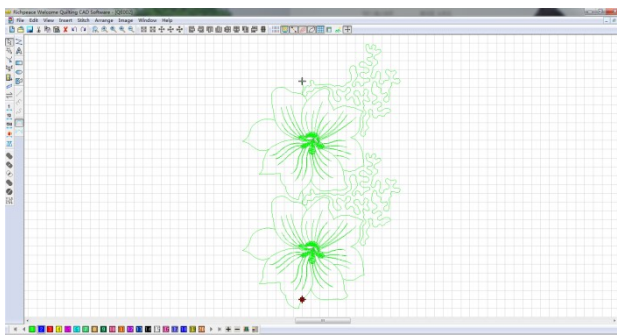

Richpeace®

Computer Function:

- Thread breakage detection, machine will automatically stop once thread gets broken
- Remember stop position and automatically back to the stopping point to continue sewing
- Emergency stop by one push on button
- Automatic needle & rotary hook positioning adjustment control by computer to ensure high precision stitch quality.
- Stitch statistic to count machine output
- Set bobbin change time by stitch or sheet number, machine stop automatically to change bobbin before bobbin thread run out.
- Storage capacity is 300,000 stitches up to 200 patterns;
- Read DST. Richpeace embroidery format, support DST.
- Power failure protection.
- USB input pattern

Embroidery Design Software:

Richpeace's professional embroidery design system is especially developed for designing, producing and simulating of computerized quilting patterns.

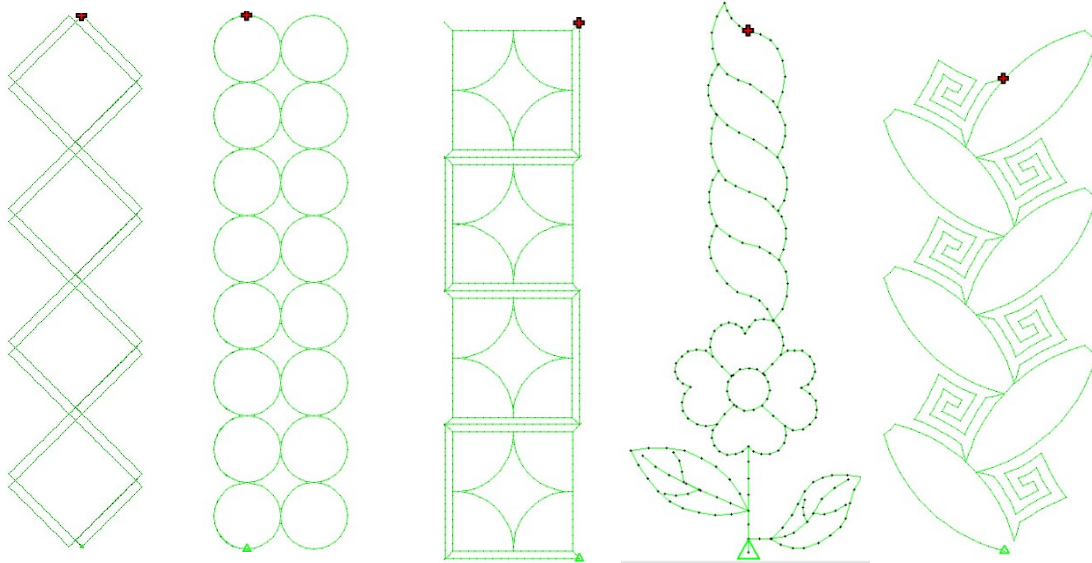

Download Free software from Richpeace website

- It enhances the establishing, setting editing and managing ability while making a embroidery pattern, also it saves your precious time.
- Its professional drawing tools enables designing all kinds of complicated quilting patterns.
- The printing & scanning functions make to observe realistic effect as easy as a breeze.
- A Build-in Design Software is included in computer control system, create or edit simple patterns fast and easily.
