

Richpeace[®]

Richpeace Automatic Disposable Shoe Cover Machine

Application: Automatic production of disposable shoe cover for medical, civil, and industrial, etc.

Product Introduction:

1. Adopts ultrasonic welding method to fold and form the shape.
2. Double elastic or triple elastic shoe cover can be produced with changing the mechanical mould.
3. Built-in PLC program control, which is high stability, low failure rate and qualified deceleration brake motor, effectively reduce the product defective rate.
4. Adjustable material racking, convenient to adjust position of material reel and control the tension for material reel, then improve product quality.
5. Friendly human-machine interface, only one person can operate.

Parameter & Configuration:

Model	RPUM-NF30-URWC-4-TS-VSA-LF2000-NA-1P220	Shoe Size	38cm×15cm
Power	7kW	Fabric Roll Width	330mm
Voltage	220V 50Hz	Max. Diameter of Fabric Roll	600mm
Production Speed	Up to 100-130pcs/min	Thickness of nonwoven fabric	15-35gsm
Applied Material	Non-woven fabric	Rubber Band Width	4mm
Floor Area	2500mm×2500mm×1550mm (L×W×H)	Weight	950kg
